## PROFESSIONAL SUMMARY

---

Results-driven Frontend Developer with 3+ years of expertise building production-grade, accessible, and performant applications using React.js, React Native, and Next.js. Delivered 3 scalable cross-platform applications serving 50,000+ active users across EdTech and ecommerce domains. Proven track record in offline-first architecture, real-time analytics, Firebase integrations, CI/CD pipelines, and technical mentorship. Promoted within 9 months for exceptional technical leadership, code quality, and driving a 40% growth in platform engagement.

## TECHNICAL SKILLS

---

|                                |                                                                                   |
|--------------------------------|-----------------------------------------------------------------------------------|
| <b>Frontend:</b>               | React.js, React Native, Expo, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3 |
| <b>State Management:</b>       | Redux, Redux Toolkit, Context API                                                 |
| <b>Styling &amp; UI:</b>       | Tailwind CSS, Bootstrap, React Native Paper, Responsive Design, Accessibility     |
| <b>Performance:</b>            | Lazy Loading, Code Splitting, Bundle Size Reduction, Memoization                  |
| <b>Testing:</b>                | React Testing Library (RTL), Unit Testing, Integration Testing                    |
| <b>Backend &amp; Database:</b> | Node.js, SQLite, REST API Integration, Firebase (FCM, Authentication, Firestore)  |
| <b>DevOps &amp; Tools:</b>     | Git, GitHub Actions, CI/CD, Agile/Scrum, VS Code, Android Studio, Google OAuth    |

## PROFESSIONAL EXPERIENCE

---

### Freelance Frontend Developer

Jan 2026 – May 2026

- Working independently with clients to build responsive web and mobile applications using React.js, React Native, and Next.js; delivering end-to-end solutions across various domains.

### Software Engineer (Promoted in 9 months) | WML IT Solutions, Hyderabad

Sep 2023 – Jan 2026

- Led end-to-end development of 3 production applications serving 50,000+ active users across EdTech and ecommerce verticals, contributing to a 40% growth in platform engagement.
- Architected offline-first infrastructure using SQLite with automatic background sync, reducing content access failures by ~90% in low-connectivity environments; improving app reliability score to 99.5%.
- Implemented Firebase Cloud Messaging (FCM) push notifications with deep-link navigation, achieving 35%+ click-through rate; integrated Google OAuth for secure domain-restricted authentication.
- Built multi-level real-time analytics dashboard using React Native and REST APIs, enabling instructors to monitor student performance across 15+ metrics.
- Optimized application performance using Lighthouse audits, lazy loading, and code splitting—achieving 30%+ improvement in First Contentful Paint (FCP) and reducing bundle size by 30%.
- Introduced auto-submission mechanism for timed assessments, eliminating 100% of manual submission failures on session timeout; wrote unit and integration tests, achieving 80%+ code coverage.
- Set up CI/CD pipelines using GitHub Actions for automated testing and deployment, reducing release cycle time by 40%.
- Earned promotion within 9 months by driving code reviews, enforcing best practices, and mentoring 3 junior developers—reducing average PR review time by 30%.

### Design Engineer | Eavetop Softtech, Bangalore

Sep 2021 – May 2022

- Transitioned from Xactimate construction estimation to front-end development, delivering production-ready, accessible HTML/CSS/JavaScript components within the first month.
- Led internal team training on web fundamentals and responsive design; recognized for rapid skill acquisition and consistently delivering high-quality, on-time deliverables.

### Career Development Break

Jun 2022 – Aug 2023

- Took a deliberate break to deepen expertise in modern frontend tooling; joined training at JSpiders, completed self-directed projects, and contributed to open-source while preparing for a senior-track role.
-

## KEY PROJECTS

---

### **Early Digital Programming Learning App** · *React Native, Expo, Redux, SQLite, Node.js, Cypress, REST API*

- Engineered comprehensive subject modules with structured assessments and progress tracking for 10,000+ students, improving course completion rates by 25%.
- Built multi-level real-time analytics dashboard with data visualization across 15+ metrics; optimized rendering with memoization, achieving <300ms dashboard load time.
- Implemented offline-first content access using SQLite with background sync, enabling zero-downtime learning in low-connectivity environments.
- Integrated AI chatbot for student-teacher communication; built auto-submission engine for timed assessments with 100% timeout reliability; achieved 80%+ test coverage.

### **Lepakshi Ecommerce Application** · *React, Next.js, React Native, TypeScript, Redux, FCM, REST API*

- Developed full-featured cross-platform ecommerce app supporting 20,000+ product SKUs with real-time inventory sync and accessibility compliance.
- Implemented Google OAuth Sign-In with domain-restricted access, eliminating 100% of unauthorized account creation for the internal user base.
- Integrated FCM for real-time push notifications with deep-link click-action navigation, achieving 35%+ notification engagement; handled 500+ daily transactions via secure Payment Gateway.
- Achieved 90+ performance score through lazy loading, image optimization, and code splitting; deployed via CI/CD pipeline with automated testing gates.

### **Expo Application Size Analyzer** · *Expo, JavaScript, AI Integration, Node.js*

- Created a custom Expo development package with AI-powered automated bundle size analysis, reducing manual audit time by 80%.
- Implemented detailed size breakdown and dependency analysis, enabling teams to identify unused dependencies—achieving up to 30% bundle size reduction per project.

### **Mera Lunch Box — Delivery Platform** · *React Native, Expo, TypeScript, Google Maps, REST API*

- Developed a subscription-based meal platform for 200+ daily school lunch box deliveries with real-time Google Maps tracking, reducing missed deliveries by 45%.
- Built delivery workflow system with route optimization, live status updates, and coordinated pickup/drop scheduling; implemented unit tests achieving 75%+ code coverage.

## EDUCATION

---

### **Bachelor of Technology (B.Tech) - 7.3 CGPA**

2018 – 2021

Sri Venkateswara University, Tirupati

## ADDITIONAL

---

- Available for immediate joining; open to hybrid and remote opportunities
